A remodel to update the equipment and facilities

We think it would be wise to invest in new kitchen equipment if it is in need of replacement, rather than cosmetic/decorating improvements.

Yes

It would a good idea to have a separate bike path on Waterside Parkway for safety reasons

Minimize investment
to keep this amenity
operational

Only minimal investment until we get a real restaurant operator who can fulfill the requirements of providing good quality foods at prices that reflect the large subsidy paid by residents for rent, utilities, equipment, etc. via the CDD. We can get better food at better prices elsewhere in the area. The quality and serving size of Waterside food has declined substantially over the past 3+ years while prices continue to increase without justification.

Yes

We have all we need,
but maintenance by
CDD Operations is
bad.

6-10 Years	No		Minimize investment to keep this amenity operational	No (Expand Trail System)	There should be separate paths for walkers and bikers. It is difficult for walkers and riders to cross narrow wooden bridges when coming from different directions. The intracoastal trail should be for Grand Haven residents only.

Yes

Add posts with doggie
bags/trash drops
periodically. Of
course- then
someone would need
to empty on a
schedule. Other
places with these
posts end up having
residents bring their
extra plastic bags and
restock as they go for
their walks. So grand
haven would not be
responsible for
restocking.

1-5 Years	Yes	With two areas: a "large dog" and a "small dog" area.	A remodel to update the equipment and facilities	The Cafe is a major hub for community social interaction. Treat it accordingly.	Yes	The tree root uplift on the sidewalks have created a fall hazard that is causing a number of residents to walk in the streets... defeating the purpose of having the safety of sidewalks. The sidewalk maintenance needs to be proactive rather than reactive.
1-5 Years	Yes	We visited the doggie park, but there was no one and no dog there, for ours to play with.	Minimize investment to keep this amenity operational	I think it's fine as it is. We think the food is a little expensive, given that basically, we own it.	Yes	It seems most people walk on the roads anyway and that seems to work, given most roads, other than Waterside Parkway have very little traffic.
Greater than 15 Years	No	Since we do not have a dog, we are not sure of the need.	Minimize investment to keep this amenity operational	We support the Cafe. If we knew more about what was outdated, we would consider moving forward, but we not in favor of a "grand style" remodel.	Yes

								<p>this is a jewel, but could use expansion and upgrade. Intercoastal esplanade is too narrow for bikes and walkers. Paths should be connected to Wild Oaks and or to City path system. 6-10 Years	Yes	The dog park in our Wild Oaks community is a hit and miss. Sometimes its "cleaned" or mowed and sometimes it takes weeks. Because of the danger of snakes I normally do not take my mini schnauzers. One of mine was bitten by a pigmy rattle.	A remodel to update the equipment and facilities	I think the cafe needs a good remodel. Keeping in mind if it can remain operational.	The walking paths in Wild Oaks need to be cared for much better.

1-5 Years	Dog Park is lacking in aesthetics, seating for the humans would be nice	Yes	There is little seating for humans, and the dog park can be very muddy. Using a synthetic grass in the park, with a hose to wash down "dog waste" would be great.	A remodel to update the equipment and facilities	This ia a valuable amenity to GH residents and it should be comfortable and updated for the staff, both front and back of the house. Yes

6-10 Years	Yes	A remodel to update the equipment and facilities	No (Expand Trail System)	Many more street lights are needed to make sidewalks safe. Currently it is not even safe to walk a dog at night!!! Sidewalks are often crooked and a tripping hazard, even along Waterside Parkway! At the same time, the Parkway is not safe for bike riders, because we have many reckless drivers in Grand Haven. It is not even safe to cross at the crosswalks due to speeding and poor driving skills.

11-15 Years	No	Unsure what this would entail.	Minimize investment to keep this amenity operational	It is obvious that remodeling needs to be done however many would miss the cafe if it were closed. 1-5 Years	Yes		A remodel to update the equipment and facilities	The cafe is nice but somewhat out of date. Upgraded indoor and outdoor seating would be a great improvement. Also, a high priority should be to have restrooms that can accommodate caregivers. The current situation with only communal restrooms in public areas is out of step with the need. Accommodating people with special needs will improve utilization of the cafe and all public areas and provides a dignified setting for our residents and visitors.	No (Expand Trail System)	The paths and trails should be more bike friendly. Also, the accessibility for those in wheelchairs/mobility devices needs significant improvement. Sidewalks and transitions to road and crosswalks are not uniformly safe for wheelchair travel.
11-15 Years	No	I'm in Wild oaks and do t like the one we have. It's a mess and people who don't live in Grand haven are always coming in to use it. 1-5 Years	Yes	i have been to the Wild Oaks dog park once....it was a swamp, with no place to sit. Make it dog and people friendly.		redecorate, but would be nice if you could put a bathroom in close...maybe in the grand haven room this is a positive enhancement to our GH amenities, especially as residents are aging and less willing to drive any distance at night for dining activities. The high quality of the food/service and reasonable pricing was a well known "secret" in PC- which is what lead to so many outsiders wanting to patronize the Cafe'. Kitchen needs an overhaul to meet today's dining needs. Cafe decor is a bit dated, but could be refreshed with paint. Dining space and the outdoor seating could use a rethink	Yes	
6-10 Years	Yes	Not a new one- just fix the issues of drainage with the WO park	A remodel to update the equipment and facilities		No (Expand Trail System)	Too many bicyclists are forced onto the streets because of so many dogs being walked on the sidewalks. This is especially so in the mornings. Waterside Pkwy has so many bumps cracks from tree roots at curbside that bicyclists ride further out in the road. With the meandering curves, it has become very dangerous for cars to pass bikers without having a clear sight of oncoming fast moving vehicles around curves.
